

FAQ – PDA Board Review

How do I load the video files to my PDA?

Palm Smartphones and PDA

1. Buy Kinoma Media Player 4 Ex for \$29 Download and install from <http://kinoma.com>
2. Use a card reader attached to your PC and a SD Memory card (2 GB or more is best)to copy the wmv video files located in the WindowsMobile folder on the PDA DVD .Then put your memory card in your PDA. You will need 1 GB of free memory on your memory card to load all of the videos at the same time.
3. Open the Kinoma player and select the video to watch.

Windows Mobile 6 Smartphones and PDAs

1. Install Active sync on your XP PC or Mobile Device Center for Vista
<http://www.microsoft.com/windowsmobile/en-us/help/synchronize/default.mspx>
2. Download the latest version of Window Media Player at
<http://www.microsoft.com/windows/windowsmedia/player/11/default.aspx>
3. The fastest method is to use a card reader attached to your PC and a SD Memory card (2 GB or more is best)to copy the wmv video files located in the WindowsMobile folder on the PDA DVD to a folder labeled Video on your SD card. Then put your memory card in your PDA. You will need 1 GB of free memory on your memory card to load all of the videos at the same time.
4. If you do not have a card reader then use your sync software or Windows Media player to copy the Board Review wmv files in the Windows Mobile folder on the PDA DVD to your memory card in your PDA. You will need 1 GB of free memory on your memory card to load all of the videos at the same time. <http://www.microsoft.com/windowsmobile/en-us/help/synchronize/default.mspx>
5. Use window media player on your PDA to watch the video
<http://www.microsoft.com/windowsmobile/en-us/help/more/windows-media-player.mspx>

iPhone and iPod Touch

1. Install the latest version of iTunes on your PC <http://www.apple.com/itunes/>
2. Establish a connection with your device
3. On your PC open iTunes and click on the Movies section of My Library
4. Click on file/add File to Library, Browse to the PDA-DVD in your DVD player and open the iPhoneiPod folder to see all the video files available. Select the ones you want to transfer to your device and click open.
5. The video should appear in your Movie list in My library
6. Click and drag the video from the list to your device in the left column to transfer the video to your device
7. You will need 2.5 GB free memory on your device to hold all the videos at the same time
8. Select your video and watch on your device by selecting the video icon

Blackberry
